## **AMENDMENTS TO THE CLAIMS**

This listing of claims replaces all prior versions of claims in the application.

- 1. (Currently Amended) A gas barrier coating composition, comprising:
- an inorganic layered compound dispersion (c), wherein an inorganic layered compound
- (b) is dispersed using a peroxide (a) in a dispersion medium, and
  - a gas barrier resin (d); and

wherein a mixture containing the peroxide (a) and inorganic layered compound (b) in a mixing ratio by mass of (a)/(b) = 2/1 to 1/1000 is dispersion treated in a high speed stirring apparatus and/or a high pressure dispersing apparatus.

- 2. (Canceled)
- 3. (Currently Amended) The gas barrier coating composition according to Claim 1 or 2 claim 1, wherein hydrogen peroxide is used as the peroxide (a).
  - 4-5. (Canceled)
- 6. (Currently Amended) The gas barrier coating composition according to Claim 1 or 2 claim 1, wherein the total content of the inorganic layered dispersion (c) and gas barrier resin (d) in the gas barrier coating composition is 1 to 30% by mass and the mass ratio (c)/(d) is 30/70 to 70/30.

Application No. 10/524,680 Attorney Docket No. 043210

- 7. (Currently Amended) The gas barrier coating composition according to Claim 1 or 2 claim 1, which contains, as the gas barrier resin (d), at least one resin selected from the group consisting of polyvinyl alcohol-based resins and ethylene-vinyl alcohol-based resins.
  - 8. (Currently Amended) A gas barrier composite plastic film or sheet,

which is obtainable by applying the gas barrier coating composition according to Claim 1 or 2 claim 1 to at least one of the surfaces of a film or sheet of a plastic selected from the group consisting of polyolefins, polyesters, polyamides and polystyrene in a coating weight to give a dry film thickness of 0.1 to 100 µm.

- 9. (Original) A gas barrier packaging container, which is obtainable by molding the gas barrier composite plastic film according to Claim 8.
- 10. (Original) A gas barrier packaging container, which is obtainable by molding the gas barrier composite plastic sheet according to Claim 8.
- 11. (Currently Amended) A gas barrier packaging container, which is obtainable by applying the gas barrier coating composition according to Claim 1 or 2 claim 1 to a plastic container molded in the form of a tube, tray, cup, box or bottle in a coating weight to give a dry film thickness of 0.1 to 100 µm.

Amendment under 37 C.F.R. §1.116 Amendment filed January 14, 2009

Application No. 10/524,680 Attorney Docket No. 043210

12. (Original) A gas barrier packaging container, which is formed of a composite layer

consisting of paper and the gas barrier composite plastic film or sheet according to Claim 8.

13. (Currently Amended) A process for producing a gas barrier coating composition

according to Claim 1 or 2 claim 1,

comprising the step of producing the inorganic layered compound dispersion (c) by

admixing a peroxide (a) and an inorganic layered compound (b) in a dispersion medium in a

mixing ratio by mass of (a)/(b) = 2/1 to 1/1000 and further treating the resulting mixture in a high

speed stirring apparatus and/or a high pressure dispersing apparatus to cleave and distribute the

eleaved inorganic layered compound (b) in the dispersion medium.
